1. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement, as set forth in the previous Office action. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, as set forth in the previous Office action.

3. Applicants' arguments filed July 19, 2004 have been fully considered but they are not persuasive. Applicants argue that shear stress is related to the properties of the material and the processing parameters of die shape and extrusion output of each layer and is calculated by using Equation 1 on page 3 of the specification. But the rejections are not based on an inability to calculate shear stress.

Applicants further argue that the shear stress occurs at the time the multi-layer sheet is extruded through a die and state that in view of knowledge in the art and guidance provided in the instant specification, one of ordinary skill in the art would be able to make and use the instantly claimed invention and that the invention as claimed is clear and definite. This is still not persuasive because the instant claims do not state at what point in the process the shear stress must be within the instantly claimed range. In addition, it also appears that the specification does not explicitly teach at what point in the process the shear stress must be within the instantly claimed range.

4.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
